Staying Healthy with a Chronic Condition

Message to Members

If you do not want the **breathe with easesm** newsletter sent to your home, just let us know. Please call **Health Improvement Hotline** at 1 (800) 377-9594 extension 182618.

All material in this newsletter is for information only. This does not replace your doctor's advice. Ask your doctor if you have questions.

Smoking and Asthma Do not Mix

Would you like help to stop smoking? Call Molina's Health Improvement Hotline at 1-800-377-9594, extension 182618 to get information about smoking cessation programs.

Every person should see the doctor regularly to make sure they are in good health. This is even more important for people with a chronic condition. A chronic condition is an illness that lasts a long time. You should see your doctor even if you do not feel sick. The doctor can make sure that your condition is well managed. This can help reduce the risks for other health problems.

THINGS TO KEEP IN MIND:

VISIT YOUR DOCTOR. See your doctor at least once a year. Depending on your condition, you may have to see your doctor more during the year. Be sure to talk to your doctor about any concerns you may have.

KNOW YOUR NUMBERS. Your doctor will check your weight, blood pressure, cholesterol, and A1c (if you have diabetes). Diabetes is a disease where the body does not make or use insulin the right way. Find out what your numbers are and where your numbers should be.

Blood Pressure:	Normal: 120/80 High: 140/90 or higher
Cholesterol:	Normal: less than 200 High: more than 200
A1c:	7% or less

Work with your doctor to keep your numbers under control.

TAKE YOUR MEDICINE. Take your medicine as prescribed. Let your doctor know if your medicine makes you sick or have other side effects. Talk with your doctor before stopping any medicines. Together, you and your doctor can find the best way to manage your condition.

MAKE SURE YOUR SHOTS ARE UP-TO-DATE. Adults need shots too! They help protect your body from deadly diseases. Ask your doctor what shots you may need.

ADOPT A HEALTHY LIFESTYLE. Include fresh fruits and vegetables in your diet every day. Try whole grain foods. Don't smoke and limit your alcohol intake. Exercise daily. Talk with your doctor before starting an exercise program.

Have you seen your doctor lately? Schedule a visit today! Keep your body healthy. Keep your chronic condition in control.

Control Your Asthma by Knowing Your Asthma Triggers

You may not always know when an asthma attack will happen, but there are things you can avoid to help prevent one. An attack can cause you to have asthma symptoms, such as:

- Chest tightness
- Shortness of breath
- Wheezing
- Cough

There are many things around you that can “trigger” asthma symptoms and cause an attack. Triggers can be simple items in your house or outside. Items can include dust, pets or the weather. Knowing what triggers your asthma symptoms can help you control your asthma.

Do you know what your triggers are?

Each person has their own triggers, so it's important to know yours. Check the items that cause you to have asthma symptoms. Discuss your triggers with your doctor and family. You can work together to avoid the triggers and keep your asthma in control.

- | | | |
|-------------------------|----------------|------------------|
| • Weather changes | • Exercise | • Illness, colds |
| • Dust | • Pollen | • Emotions |
| • Mold | • Pet dander | • Certain foods |
| • Tobacco or wood smoke | • Strong odors | • Other: _____ |

How can you avoid your triggers?

- Wash sheets and blankets every week in hot water.
- Vacuum often.
- Keep windows closed to limit house dust.
- Do not allow smoking in your house.
- Avoid outside activity when pollen levels, wind and air pollution are high.
- Keep pets out of your bedroom.

Did you know?

The Air Quality Index (AQI) tells you how bad the air is outside. To find out if the air in your town is good or bad check out your local paper or visit www.airnow.gov.
