## **DRUG FORMULARY**

The Molina Drug Formulary was created to help manage the quality of our members' pharmacy benefit. The Formulary is the cornerstone for a progressive program of managed care pharmacotherapy. Prescription drug therapy is an integral component of your patient's comprehensive treatment program. The Formulary was created to ensure that Molina members receive high quality, cost-effective, rational drug therapy.

The Molina Pharmacy and Therapeutics Committee meets quarterly to review and recommend medications for Formulary consideration. This assures that the Formulary remains responsive to physician and patient needs. The Committee is composed of physicians and pharmacists representing various medical specialties. With a primary consideration to provide a safe, effective and comprehensive Formulary, the Committee evaluated all therapeutic categories and has selected the most cost-effective agent(s) in each class. The Committee also uses reference materials from the CVS/Caremark Pharmacy and Therapeutics Advisory Panel. In addition, the Molina Pharmacy and Therapeutics Committee reviews prior authorization procedures to ensure medications are used safely, following manufacturer's guidelines and current medical practices.

Please familiarize yourself with the Drug Formulary as you prescribe medications for Molina members. Thank you for your cooperation.

## **PRESCRIPTION CLAIMS PROCESSOR**

Molina has selected CVS/Caremark as the Pharmacy Benefit Management (PBM) company to manage the prescription benefit for Molina members.

Questions on processing claims, formulary status or rejected claims may be directed to the PBM Help Desk at (800) 791-6856.

Membership and eligibility concerns may be addressed by calling the Molina Membership Services at (888) 483-0760.

Provider-related questions may be addressed by calling the Molina Provider Services (801) 858-0482.

## PREFACE

### USING THE MOLINA DRUG FORMULARY

The Molina Drug Formulary is a listing of preferred drug products eligible for reimbursement by Molina. All medications are listed by generic name. The medications are organized by therapeutic classes. For your convenience, an index by both brand and generic names is located at the end of the Drug Formulary.

### INDIVIDUAL PRESCRIPTIONS

Each prescription must legally be prescribed for one individual only. If prescribing for a family, each family member must receive a prescription.

### INJECTABLE MEDICATIONS

Injectables (except insulin, Depo-Provera, and other specific medications noted in the Formulary) are generally not eligible for reimbursement under the outpatient prescription drug program without prior authorization.

### GENERIC MEDICATIONS

Selected medications have FDA-approved generic equivalents available. The Molina drug endorsement states... "generic drugs will be dispensed whenever available".

If the use of a particular brand-name becomes medically necessary as determined by the physician, the physician must contact the Medical Director or his designee for prior authorization.

Molina encourages the use of quality generic products. Only those generic products which have received an "AB" rating by the FDA should be utilized. Physicians are encouraged to write "Brand Only" or "DNS" only when medically necessary.

The Pharmacy and Therapeutics Committee recognizes that certain medications possess narrow therapeutic dose response characteristics. Therefore, the following drugs are not recommended to be generically substituted, unless the patient has been therapeutically maintained on the generic product for a period of time.

Generic Name	Brand Name
Digoxin	Lanoxin
Levothyroxine	Synthroid or Levoxyl
Warfarin	Coumadin

## **NON-COVERED MEDICATIONS**

Please note that certain medications are not covered. These include, but are not limited to:

- Appetite Suppressants / anorexiant for weight loss
- Retinoic Acid for Cosmetic Purposes
- Experimental or Investigational Medications
- Progesterone Suppositories
- Convenience Dosage Forms (Transdermal Patches) not listed in the Formulary
- Injectables administered in the physician's office (other than Depo-Provera)

## **PRIOR AUTHORIZATION REQUEST PROCEDURE**

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when Formulary alternatives have demonstrated ineffectiveness. When these exceptional needs arise, the physician may fax a completed "Prior Authorization / Medication Exception Request" form to Molina. The forms may be obtained by calling Molina Healthcare of Utah at (888) 483-0760.

## **PRESCRIPTION QUANTITIES**

Prescriptions should be written for a therapeutic supply of medications (the amount to appropriately treat a medical condition) up to a maximum of a 30-day supply. Trial quantities may be used when trying new treatments, if appropriate.

## **TELEPHONE PRESCRIPTIONS**

Whenever possible, the member should be given the prescription in writing. This will allow the member to make use of the most convenient network pharmacy and enable the pharmacy to fill the prescription after normal office hours.
