

December, 2009

Dear Molina HealthCare of Michigan Provider:

Enclosed is the 2009/2010 Molina Healthcare of Michigan condensed Formulary “*At a Glance*”. This formulary is provided as a quick reference guide when you are making decisions about medications.

- “*At a Glance*” contains information on coverage for both prescription and over the counter medications and includes the most commonly prescribed medications.
- Medications that are formulary and do not require authorization are listed. In most cases, these can be prescribed without any additional paperwork. Formulary medications that require prior authorization are noted.
- Important information is on the bottom of the page that can expedite your requests.
- The formulary book is also being updated and will be sent to providers soon.

The Molina Healthcare of Michigan Formulary is reviewed and approved by the Pharmacy and Therapeutics (P&T) Committee. This committee is composed of physicians and providers who represent various specialties. This committee meets quarterly to review and recommend medications for formulary consideration. The goal is to assure the Formulary remains responsive to physician and patient needs. In addition, the P&T Committee reviews prior authorization procedures to ensure medications are used safely, follow manufacturer’s guidelines and current medical practices.

In addition to the condensed Formulary “*At a Glance*”, information can be found at:

- [www.molinahealthcare.com](http://www.molinahealthcare.com), then choose Providers, Michigan, Drug List (the updated 2009/2010 formulary book will be available soon). Periodic updates to the Formulary can be found on the website along with other important documents such as *Ez Rx Newsletters*.
- Please remember the formulary is also available for PDA download at: [www. Epocrates.com](http://www.Epocrates.com)

Thank you for your continued support, partnership and for providing quality care for Molina Healthcare members. We are always looking for ways to support the most effective healthcare for our members and improve service to our providers.
