PULMONARY/ASTHMA

TELE-CLINIC

Have you ever wanted a consultation with a pulmonary specialist without you or your patient leaving the clinic?

Please join us!

Pulmonary/Asthma Telemedicine

Asthma affects 6

percent of the general population.

Together we can help your patients breathe easier.

Please join us!

Pulmonary Asthma

Telemedicine Clinic will

be held routinely on

the 2nd and 4th Fridays

of the month from 12

Noon to 1 PM.

Pulmonary

Michelle Harkins, MD is beginning the process to conduct an asthma/ obstructive airways disease management clinic. It will initially involve case presentation of complex obstructive airway disease and asthma patients, and then broaden to include a variety of pulmonary diseases.

We envision having training sessions here in our clinic for interested asthma educators as well so that they can go back to their communities to help providers monitor asthmatics. We will also focus on environmental triggers for lung disease.

Working to
Bring Specialty
Healthcare to All
New Mexicans

Project **ECHO** (Extension for

Community Healthcare

Outcomes) is a new and

innovative model in treating

complex chronic diseases

in rural and underserved areas of

New Mexico. Via technology,

ECHO bridges the gap between

urban healthcare specialists and

providers in rural settings.
