

Dear Molina Healthcare Practitioner/Provider:

We are pleased to invite your practice to participate in an incentive program that is designed to improve the quality of care provided to Molina Healthcare of New Mexico, Inc. (Molina Healthcare) Members while increasing your reimbursement.

The program begins June 14, 2010 and has the following components:

1. For a screening mammogram that you order and document using an appropriate code in the attachment this will generate \$200 for your practice.
2. For a screening Pap smear that you obtain and submit for lab analysis and document using the code in the attachment this will generate \$200 for your practice.
3. For diabetic members when you order and document a hemoglobin A1C this will generate \$100 for your practice.
4. For diabetic members when you order and document LDL Cholesterol this will generate \$100 for your practice.
5. Every immunization that you provide and bill using an appropriate code in the attachment will generate \$100 for your practice.

Please note that unlike prior incentive programs, the additional reimbursement will not pay through our standard claims remittance procedure. Instead, we will track for each practice all services billed by your practice. Services will be tracked and paid using a “First Come, First Serve” methodology. You must use only the codes listed in the attachment. No other codes will be tracked or eligible for the incentive.

**Please note:** This program will run through August 2010, or until available funds are disbursed, whichever comes first.

Thank you for providing quality care to the members of Molina Healthcare. If you have questions, please contact your Molina Healthcare Provider Services Representative toll free at (800) 377-9594.

Sincerely,

Eugene Sun MD  
Chief Medical Officer

	<i>Adacel</i>	90715	Sanofi-Pasteur	
	<i>Boostrix</i>	90715	GlaxoSmithKline	
<b>Td</b>	<i>Td</i>	90714		Tetanus, diphtheria toxoids
	<i>Decavac</i>	90714	Sanofi-Pasteur	
<b>Tetanus</b>	Tetanus	90703		Tetanus only
<b>Diphtheria</b>	Diphtheria	90719		Diphtheria only

Additional Information				
Vaccine Name	Abbreviations you may see & Brand Names	CPT	Manufacturer	What is in it?
<b>Polio</b>	Oral Polio OPV Orimune Trivalent Polio			Oral poliovirus vaccine is no longer used in the US - but would count if found in the record
	Sabin			Oral Poliovirus Vaccine - Used outside US
<b>DTP</b>	DTP or DPT <i>Tri-Immunol</i> <i>TripleAntigen</i>			These do not count if found in the record. Forms may still list DTP/DTaP. DTP is no longer used in the US
<b>DTP &amp; Hib</b>	DTP-Hib ActHIB-DTP DTP-ActHib DTP/HbOC DTP-OmniHIB H-DTP OmniHIB-DTP <i>Tetramune</i> <i>Quadruple</i>			These do not count if found in the record as DTP-Hib combo vaccines. Some Hib vaccines are conjugated to DTP as a vehicle. There is no immunity bestowed on DTP. DTP would need to be "activated" as in the current vaccine <i>Tripedia-ActHIB</i> as noted in Tab 1
<b>Hib</b>	<i>Hiberix</i>	90645	GlaxoSmithKline	This vaccine is generally only used outside the U.S. - it is only a booster shot in the U.S. for older kids not in the CIS age range.
<b>Hepatitis B</b>	HBIG**			Hepatitis B Immune Globulin - **Does not count as 1st Dose HepB sometimes given at birth if infant is at risk of exposure to HepB - only provides short term protection.
