

Billing for Depo Provera

Molina Healthcare pays for Depo-Provera injections as a medical claim; Molina Healthcare does not cover Depo Provera through retail pharmacies. The medical service is billable using J1055 (Medroxyprogesterone Acetate 150mg). The current Ohio Medicaid allowable rate for the service is \$41.93 (see Ohio Administrative Code 5101:3-1-60 Appendix DD).

If you maintain a supply of this drug in your office, please be aware that generic alternatives are available for Depo Provera. For your information, following is a list of NDC codes and the associated costs for the drug.

Coordination of Benefits with Medicare

The state of Ohio will no longer retroactively terminate Molina Healthcare members who are determined to be also covered by Medicare. Based on the date of notification, the termination date will be the end of the month they process the request, or the end of the next month. Benefits for these members will be coordinated with Medicare until the effective date of the member's termination.

Healthchek Webinars

Medicaid-eligible children are entitled to receive a comprehensive package of preventive health care, including all well child care recommended by the American Academy of Pediatrics and the Early Periodic Screening, Diagnosis and Treatment (EPSDT) child health requirements. This package of preventive care services is known as Healthchek in Ohio.

Want to learn more about Healthchek? Molina Healthcare and the other health plans serving Medicaid consumers in Ohio are working to improve utilization of these services. To help providers get a better understanding of Healthchek, a series of webinars has been scheduled.

Date	Time	Meeting Number
July 28	Noon	969 519 672
July 30	9am	961 937 545
August 25	2pm	961 172 391
August 26	9am	961 226 269
September 8	2pm	967 702 413
September 16	11am	968 040 130
September 22	Noon	962 432 070
September 24	Noon	968 297 362
September 30	4pm	963 465 469

To join the webinar:

Internet: Go to <https://hsh.webex.com> and enter the meeting number.

Phone: Call 1-866-699-3239 and enter the meeting number.

McNeil Product Recalls

McNeil has set up a website with information on product recalls, including children's Tylenol, Motrin, Benadryl and Zyrtec. Visit www.mcneilproductrecall.com for information.

Appropriate Coding for HEDIS® Measures

Molina Healthcare, like most other payers, uses HEDIS® measures to evaluate the quality of healthcare provided to our members. Following HEDIS® coding guidelines is crucial for accurate quality reporting, appropriate reimbursement and to reduce the administrative burden of medical record data collection during HEDIS® season.

Services obtained from any Primary Care Provider, including Physician Assistants and Nurse Practitioners, can be counted for these measures - even when the provider is not specified as the member's PCP. Ob/Gyn visits also count.

Services that occur over multiple visits, including sick visits, also count towards these measures. Therefore, it is important to document any of the applicable services rendered, even when all of the requirements are not met at an individual visit.

Example: Seeing a teen for contraception (V25 - Encounter for Contraceptive Management) typically involves an age and gender-appropriate history, examination, counseling/anticipatory guidance/risk factor reduction and ordering or performing lab or diagnostic procedures. In this case, coding 99394 or 99395 in addition to the V25 is appropriate and will meet the criteria for the Adolescent Well-Care Measure.

The list below includes the criteria necessary to meet HEDIS® measurement standards:

HEDIS Measure	Age Range	Documentation needed	Codes
Well-Child Visits in the First 15 Months of Life	Birth – 15 months	Anticipatory Guidance - address safety issues, nutrition, independence, socialization, etc. Physical and Mental Development - developing appropriately for age, quiets when picked up, etc. Physical Exam - height, weight, head circumference, chest, heart, lungs, etc.	99381 99382 99391 99392 V20.2 V20.31 V20.32 V70.3 V70.5 V70.6 V70.8
Well-Child Visits in the 3 rd , 4 th , 5 th and 6 th Years of Life	3 – 6 years	Anticipatory Guidance - address safety issues, health education, etc. Health and Developmental History - both physical and mental Physical Exam - height, weight, BMI, heart, lungs, abdomen, etc.	99382 99383 99392 99393 V20.2 V70.3 V70.5 V70.6 V70.8
Adolescent Well-Care Visits	12 – 21 years	Anticipatory Guidance/Health Education - advise on diet, exercise, smoking, contraception, etc. Health and Developmental History - both physical and mental Physical Exam - BMI, blood pressure, height, weight, heart, lungs, abdomen, etc.	99384 99385 99394 99395 V20.2 V70.0 V70.6 V70.8
