Chronic Diagnosis | QuickCoder

This pamphlet provides examples of chronic illness and/or disability diagnoses codes. It also illustrates best practices for physicians and medical billing staff to code ICD-9-CM diagnosis codes on CMS-1500 Claim forms to the highest level of specificity. The Chronic Disease and Disability Payment System (CDPS) is a payment system Medicaid programs can use to make health-based capitated payments for disabled Medicaid beneficiaries. It is important to note that the codes listed are not all inclusive and should not be considered as a definitive list of conditions chronically ill or disabled patients can present with after thorough examination from their physician. The complete understanding of the components of a comprehensive chronic illness care plan is our mutual goal to help individuals maintain the highest possible quality of life.

## **Chronic Disease and Disability Payment System Information**

The Chronic Disease and Disability Payment System (CDPS) uses diagnoses from both ambulatory and inpatient encounter data to calculate patient acuity.

- The acuity factor is an indicator of the resources needed to care for the patient
- CDPS organizes diagnoses into 19 major categories, which correspond to body systems and types of diagnoses
- Each diagnosis category and subcategory is assigned a weight
- The higher the weight, the higher the acuity factor

## What can Molina Healthcare participating providers do to help?

- Encourage your patients to come in for office visits
  - Welcome Postcards, Calls, Reminder cards
  - Aged, Blind or Disabled (ABD) members should be seen at least 2 to 4 times per year for their chronic condition
- Submit accurate and timely encounters for every office visit
  - Always report each chronic condition on the claim form
  - Be specific on diagnosis coding, ill-defined and not otherwise classified (NOC) diagnoses receive NO points in the CDPS scoring
  - Your claims must be submitted according to Washington Uniform Billing Guidelines

Beware of super bills populated with non-specific diagnosis codes
