

MOLINA HEALTHCARE OF WASHINGTON

Secondary Prevention and Risk Reduction Therapy for Patients With Coronary and Other Atherosclerotic Vascular Disease CLINICAL PRACTICE GUIDELINE

Molina Healthcare of Washington has reviewed its Secondary Prevention and Risk Reduction Therapy for Patients With Coronary and Other Atherosclerotic Vascular Disease Clinical Practice Guideline. The current guideline is based on the American College of Cardiology/American Heart Association (ACC/AHA). The ACC/AHA recommendations were adopted by the Molina Healthcare of Washington Clinical Quality Improvement Committee on January 12, 2005, October 25, 2006, September 25, 2008, September 2, 2010, September 6, 2012, September 4, 2014 and January 22, 2016, February 15, 2017, March 9, 2018.

The Clinical Practice Guideline may be accessed from: [AHA/ACCF Secondary Prevention and Risk Reduction Therapy for Patients With Coronary and Other Atherosclerotic Vascular Disease: 2011 Update](#)

Important Points Preventing Heart Attack Guideline

This preventive heart attack clinical practice guideline from the ACC/AHA has not been updated since 2014 to be congruent with current the ACC/AHA guideline on cholesterol management or the Eighth Joint National Committee (JNC8) guideline for hypertension control. Please view Molina Healthcare of Washington's Hyperlipidemia and Hypertension clinical practice guidelines for current recommendations.
