

If you have diabetes...

Normal Vision

Vision with Diabetic Eye Disease

...a simple eye exam can save your sight!

- If you have diabetes you are at a greater risk for blindness even though your vision may seem fine
- Only a dilated eye exam – by an eye doctor – can find the changes in your eyes that could lead to blindness
- Early treatment of diabetic eye disease can prevent blindness
- To arrange a simple eye exam, contact your eye care provider or ask your regular doctor for a referral.

Annual Diabetes Eye Exam

You should have a diabetes dilated eye exam every year.

- Complete the member section.
- Have your eye care provider complete the provider section and fax this page back to Molina Healthcare of Washington to receive a \$10 Safeway gift card.
