## **Provider Survey: Enhancing Support for Pregnant Members with Complex Needs**

Molina Healthcare of New Mexico, in collaboration with other Managed Care Organizations, is conducting a provider survey to assess current screening and referral practices for pregnant members with complex behavioral health and substance use needs, including access to medication-assisted treatment (MAT) services and Baby-Friendly practices. This effort aims to identify gaps, understand provider challenges, and enhance support through improved resources, training, and care coordination. Your input is essential in shaping solutions that improve maternal and infant health outcomes.

We invite providers to give their feedback on how we can better support you. This survey should take no more than five minutes to complete: [Prenatal and Perinatal Providers Informational Survey](#)

Thank you for your participation and partnership in this important initiative.
