

Follow-Up After Emergency Department Visit for Substance Use (FUA)

MEASURE DESCRIPTION

The percentage of emergency department (ED) visits for patients 13 years of age and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, for which there was follow-up. Two rates are reported:

1. The percentage of ED visits for which the patient received follow-up within 30 days of the ED visit (31 total days).
2. The percentage of ED visits for which the patient received follow-up within 7 days of the ED visit (8 total days).

HOW TO IMPROVE HEDIS® SCORES

- Schedule a follow-up visit within 7 days and at least two additional visits within 30 days or refer immediately to a PCP or behavioral health provider when giving a diagnosis of alcohol or other drug dependence. Telephone and/or telehealth appointments within the required timeframe meets compliance.
- Refer the member to a Molina Care Manager or work collaboratively with the Molina Care Manager if one is already assigned to help increase member's access and motivation for treatment.
- Follow-up visits must be supported by a claim, encounter or note from the mental health practitioner's medical chart in order to count toward the measure.
- Document identified substance abuse in the patient chart and submit a claim with the correct billing codes.
- Review situations where there are comorbid medical conditions. Be sure to include all diagnoses and use substance use related codes (ex. Cellulitis- L03.90 related to Intravenous Drug use F11.20) as these also qualify patients for the measures.
- Provide patient educational materials and resources that include information on the treatment processes and options, including mutual support groups and other community-based programs.

“The USPSTF recommends screening by asking questions about unhealthy drug use in adults age 18 years or older. Screening should be implemented when services for accurate diagnosis, effective treatment, and appropriate care can be offered or referred.”
