Medical Record Scores
Note: Score "R" for Documented Member Refusal (due to member non-compliance with evidence showing provider outreach, referrals, lab orders, awaiting results.)
When scoring for OB/CPSP Preventive, score the Adult or Pediatric Preventive criteria for the same record.

Since Preventive Criteria have different points possible per type (Ped-34, Adult-30, OB/CPSP-59, the total points possible will differ from site to site, depending on the number of types of records that are selected The "No's" column may be used to help double-check math. The far-right Section Score \% column may be used to determine if section is $<80 \%$.

Note: Any section score of < 80\% requires a CAP for the entire MRR, regardless of the Total MRR score.
2) Add points given for all six (6) sections
3) Subtract "N/A" points (if any) from total points possible to get "adjusted" total points possible.
4) Divide total points given by "adjusted" total points possible
5) Multiply by 100 to determine compliance rate as a percentage.
