Integrating Lung Cancer Screening and Tobacco Cessation in Clinical Practice - CME Activity

This is an advisory notification to Molina Healthcare of California (MHC) network providers applicable to all lines of business.

What you need to know:

This CME activity is designed to improve population health by equipping healthcare professionals with the tools and strategies to reduce tobacco use and increase access to lung cancer screening, particularly in high-risk and underserved communities. Through collaboration among providers, public health leaders, and community organizations, this session promotes data-driven quality improvement and teamwork to close gaps in screening and cessation.

Objectives

1. Identify barriers to implementing tobacco cessation and lung cancer screening in clinical care.
2. Demonstrate integration of brief interventions and EHR tools to enhance screening and referral.
3. Discuss culturally responsive approaches to engage high-risk and underserved populations.
4. Outline system-level and community strategies that support implementation and sustainability.
5. Discuss possible barriers and biases that may impact patient care (i.e., race, ethnicity, language, gender identity/orientation, age, socioeconomic status, attitudes, feelings, or other characteristics).

This activity has been approved for AMA PRA Category 1 Credit™.

For additional details on how to obtain CME credit, please visit:

Provider Action

To register, please see the attached flyer.

What you need to know CONT:

Come and Learn about the City of Hope and LAC-TCPP Partnership to Advance Equitable, Evidence-Based Tobacco Control.

In partnership with the Los Angeles County Tobacco Control and Prevention Program (LAC-TCPP), City of Hope is building a culturally responsive, two-way learning network focused on communities most impacted by tobacco use. We welcome health leaders, clinicians, researchers, policymakers, community health professionals, tobacco cessation champions, and community health advocates across sectors to join this effort.

What Is Offered:

- A space for peer learning, idea exchange, and networking
- Sharing of best practices and evidence-based tobacco treatment strategies
- Training and technical support for tobacco cessation and lung cancer screening
- Support for culturally tailored cessation projects and quality improvement
- Opportunities to obtain CME/CE
- Two optional tobacco cessation learning collaborative breakout sessions after the educational event:
 - I. Asian/Asian American communities
 - II. American Indian, Alaska Native, Native Hawaiian, and Pacific Islander (AI/AN NHPI) communities

When this is happening:

Date: Wednesday, June 18, 2025

Time: 3:00 PM – 4:30 PM (PDT)

Location: Online

What if you need assistance?

Tobacco Cessation Learning Collaborative

In partnership with the Los Angeles County Tobacco Control and Prevention Program (LAC-TCPP), City of Hope is building a culturally responsive, two-way learning network focused on communities most impacted by tobacco use. We welcome health leaders, clinicians, researchers, policymakers, community health professionals, tobacco cessation champions, and community health advocates across sectors to join this effort.

Integrating Lung Cancer Screening and Tobacco Cessation in Clinical Practice

Wednesday, June 18, 2025

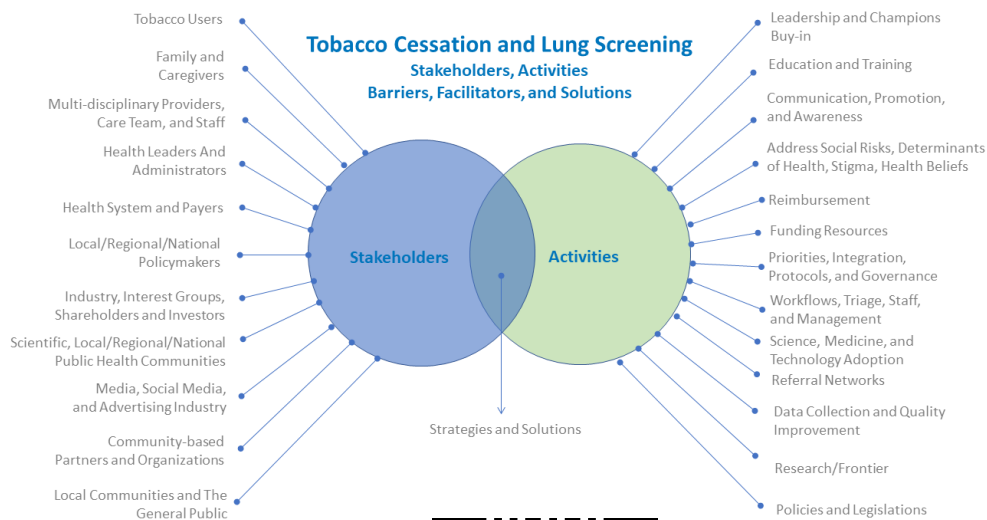

3 to 4 p.m. PT

Virtual Webinar

This activity has been approved for *AMA PRA Category 1 Credit™*

Learning Objectives

1. Identify barriers to implementing tobacco cessation and lung cancer screening in clinical care.
2. Demonstrate integration of brief interventions and EHR tools to enhance screening and referral.
3. Discuss culturally responsive approaches to engage high-risk and underserved populations.
4. Outline system-level and community strategies that support implementation and sustainability.
5. Discuss possible barriers and biases which may impact patient care (i.e., race, ethnicity, language, gender identity/orientation, age, socioeconomic status, attitudes, feelings, or other characteristics).

Tobacco cessation and lung screening are cost-effective and can save lives, however systemic and individual barriers exist. This CME activity is designed to improve population health by equipping healthcare professionals with the tools and strategies to reduce tobacco use and increase access to lung cancer screening, particularly in high-risk and underserved communities. Through collaboration among providers, public health leaders, and community organizations, this session promotes data-driven quality improvement and teamwork to close gaps in screening and cessation.
