

DME Navigator – Program Implementation Delay

Attn: DME Providers

The implementation of the DME Navigator® program, previously scheduled for **July 1, 2026**, has been delayed due to incomplete configuration and readiness testing.

At this time, **no changes will occur on July 1, 2026**. Providers should continue to follow current DME referral, authorization, and servicing processes until further notice. A new implementation date will be communicated once confirmed, along with updated guidance and supporting materials to ensure a smooth transition. We appreciate your continued partnership and will provide additional updates as they become available.
