## Atopic Dermatitis (Elidel-Protopic-Eucrisa) IL Medicaid Only

### PRODUCTS AFFECTED

ELIDEL (pimecrolimus)  
EUCRISA (crisaborole)  
PROTOPIC (tacrolimus)

### COVERAGE POLICY

*Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.*

*This Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide Molina Healthcare complete medical rationale when requesting any exceptions to these guidelines*

#### **Documentation Requirements:**

*Molina Healthcare reserves the right to require that additional documentation be made available as part of its coverage determination; quality improvement; and fraud; waste and abuse prevention processes.*

*Documentation required may include, but is not limited to, patient records, test results and credentials of the provider ordering or performing a drug or service. Molina Healthcare may deny reimbursement or take additional appropriate action if the documentation provided does not support the initial determination that the drugs or services were medically necessary, not investigational or experimental, and otherwise within the scope of benefits afforded to the member, and/or the documentation demonstrates a pattern of billing or other practice that is inappropriate or excessive*

#### **DIAGNOSIS:**

Atopic Dermatitis (all products), Intertriginous Psoriasis, Vulvar Lichen Sclerosus, Oral Lichen Planus, Pyoderma Gangrenosum, Vitiligo

#### **REQUIRED MEDICAL INFORMATION:**

This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. If a drug within this policy receives an updated FDA label within the last 180 days, medical necessity for the member will be reviewed using the updated FDA label information along with state and federal requirements, benefit being administered and formulary preferencing. Coverage will be determined on a case-by-case basis until the criteria can be updated through Molina Healthcare, Inc. clinical governance. Additional information may be required on a case-by-case basis to allow for adequate review

#### **A. ATOPIC DERMATITIS (FOR ALL PRODUCTS):**

1. Protopic (tacrolimus)/Elidel (pimecrolimus): Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication (e.g., areas involving the face, neck or intertriginous areas) to at least TWO formulary medium or high potency topical steroids

OR

## Drug and Biologic Coverage Criteria

2. Eucrisa (crisaborole) ONLY: Documentation of up to a 30 day trial and failure of ONE topical corticosteroid OR ONE topical calcineurin inhibitor in the last 180 days.

### B. INTERTRIGINOUS PSORIASIS (PIMECROLIMUS & TACROLIMUS ONLY):

1. Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication to at least TWO formulary low potency topical steroids (see Appendix)

### C. VULVAR LICHEN SCLEROSUS (PIMECROLIMUS & TACROLIMUS ONLY):

1. Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication to at least TWO formulary very high potency topical steroids (see Appendix)

### D. ORAL LICHEN PLANUS (PIMECROLIMUS & TACROLIMUS ONLY):

1. Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication (e.g., areas involving the face, neck or intertriginous areas) to at least TWO formulary topical steroids (see Appendix)

### E. PYODERMA GANGRENOSUM (TACROLIMUS ONLY):

1. Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication (e.g., areas involving the face, neck or intertriginous areas) to at least TWO formulary topical steroids (see Appendix)

### F. VITILIGO (PIMECROLIMUS & TACROLIMUS ONLY):

1. Documentation that the member experienced an inadequate treatment response (minimum 2-week trial), intolerance, or contraindication (e.g., areas involving the face, neck or intertriginous areas) to at least TWO formulary topical steroids (see Appendix)

## CONTINUATION OF THERAPY:

### A. EUCRISA ONLY

1. Documentation that member meets initial criteria.

### B. PIMECROLIMUS & TACROLIMUS ONLY [ALL INDICATIONS]:

1. Documentation that member's condition has improved based upon the prescriber's assessment of disease control and clinical improvements while on therapy (e.g., reduction of affected BSA, improvements in severity of eczematous lesions, decrease in pruritus severity)  
AND
2. Member's condition has not worsened while on therapy. Worsening may be defined as: Red, scaly, itchy, and crusted bumps; swelling, cracking, "weeping" clear fluid; Coarsening and thickening of the skin

## DURATION OF APPROVAL:

Initial authorization: 6 months

Continuation of Therapy: 12 months

## PRESCRIBER REQUIREMENTS:

None

## AGE RESTRICTIONS:

Elidel (pimecrolimus) 1%: 2 years of age and older

Eucrisa (crisaborole) 2%: 3 months of age and older

Protopic (tacrolimus) 0.03% ointment: 2 years of age and older

## Drug and Biologic Coverage Criteria

Protopic (tacrolimus) 0.1% ointment: 16 years of age and older

### QUANTITY:

Up to a 60-day supply per fill

Eucrisa: 300 grams per year

### PLACE OF ADMINISTRATION:

The recommendation is that medications in this policy will be for pharmacy benefit coverage and patient self-administered

### PLACE OF SERVICE:

Retail Pharmacy

The recommendation is that medications in this policy will be for pharmacy benefit coverage and patient self-administered

## DRUG INFORMATION

### ROUTE OF ADMINISTRATION:

External, Topical

### DRUG CLASS:

Phosphodiesterase 4 (PDE4) Inhibitors - Topical

Calcineurin-inhibitor Immunosuppressants - Topical

### FDA-APPROVED USES:

Eucrisa (crisaborole) ointment: indicated for topical treatment of mild to moderate atopic dermatitis in adult and pediatric patients 3 months of age and older

Protopic (tacrolimus): indicated as second-line therapy for the short-term and noncontinuous chronic treatment of moderate to severe atopic dermatitis in nonimmunocompromised adults and children, who have failed to respond adequately to other topical prescription treatments for atopic dermatitis or when those treatments are not advisable

Elidel (pimecrolimus): indicated as second-line therapy for the short-term and noncontinuous chronic treatment of mild to moderate atopic dermatitis in nonimmunocompromised adults and children 2 years of age or older, who have failed to respond adequately to other topical prescription treatments for atopic dermatitis or when those treatments are not advisable

### COMPENDIAL APPROVED OFF-LABELED USES:

PIMECROLIMUS & TACROLIMUS ONLY: Intertriginous psoriasis, Vulvar lichen sclerosus, Oral lichen planus, Vitiligo

TACROLIMUS ONLY: Pyoderma gangrenosum

## APPENDIX

### APPENDIX:

#### Very High Potency

Betamethasone dipropionate (augmented)

Clobetasol propionate

Halobetasol propionate

#### High Potency

Amcinonide

Betamethasone dipropionate

Desoximetasone gel, ointment, or cream 0.25% or more

## Drug and Biologic Coverage Criteria

Diflorasone diacetate cream  
Fluocinonide  
Halcinonide  
Triamcinolone 0.5% or more

### Medium Potency

Betamethasone valerate  
Clocortolone  
Desoximetasone cream less than 0.25%  
Fluocinolone ointment or topical solution or cream less than 0.2%  
Flurandrenolide 0.025% or more  
Fluticasone  
Hydrocortisone butyrate  
Hydrocortisone valerate  
Mometasone  
Prednicarbate  
Triamcinolone acetonide less than 0.5%

### Low Potency

Alclometasone  
Desonide  
Flurandrenolide less than 0.025%  
Hydrocortisone base

## BACKGROUND AND OTHER CONSIDERATIONS

### BACKGROUND:

The American Academy of Dermatology guidelines for the care and management of atopic dermatitis recommend topical corticosteroids for patients with atopic dermatitis who have failed to respond to standard nonpharmacologic therapy. They also recommend the use of topical calcineurin inhibitors (tacrolimus, pimecrolimus) in patients who have failed to respond to, or who are not candidates for topical corticosteroid treatment.

### CONTRAINDICATIONS/EXCLUSIONS/DISCONTINUATION:

All other uses of ELIDEL (pimecrolimus), EUCRISA (crisaborole), and PROTOPIC (tacrolimus) are considered experimental/investigational and therefore, will follow Molina's Off-Label policy.

### OTHER SPECIAL CONSIDERATIONS:

Elidel (pimecrolimus) and Protopic (tacrolimus) both have a black box warning for malignancy (for example, skin and lymphoma). Continuous long-term use of any age and application to areas not involved with atopic dermatitis should be avoided. Use of Elidel and Protopic 0.03% should be limited to individuals aged 2 years or older. Protopic 0.1% is not indicated for use in children less than 16 years of age.

## CODING/BILLING INFORMATION

*Note: 1) This list of codes may not be all-inclusive. 2) Deleted codes and codes which are not effective at the time the service is rendered may not be eligible for reimbursement*
