

A Provider's Guide to Billing for Vaccinations

How is it being paid for and are there any co-pays with vaccines?

Vaccinations can either be billed through the pharmacy (Part B or Part D) via the pharmacy benefit manager claims processing system, or through the prescriber's office (traditional "buy and bill" to the health plan for part B). For part D vaccines the MDO bills through Transact Rx, or the member pays the provider and is reimbursed through the Direct Member Reimbursement process. There are no co-pays associated with vaccinations for the member. If a dual eligible member is obtaining a Part D vaccine from the pharmacy and it is administered in the doctor's office, the member may be charged for the cost of administration. Please see below for more details.

Do any vaccines require a benefit determination?

Under the pharmacy benefit, **only ENGERIX-B and RECOMBIVAX HB require a benefit determination.** Both will reject at point of sale at a pharmacy for "MED B/D DETERMINATION REQUIRED." The Senior Whole Health pharmacy department follows up and resolves these claims as part of day to day operations.

Under the medical benefit ("buy and bill"), no prior authorization is required.

There are some vaccines that are excluded from Medicare, and members will need to assume responsibility for the cost of those vaccines. Please see "Are there any vaccines that are not covered by Medicare" for additional details below.

How do prescriber's bill for administration after vaccines are picked up at the pharmacy?

Prescriber's have the option of sending the prescription for the vaccine to a pharmacy for the member. The pharmacy will order and bill the vaccine to Express Scripts and then send the vaccine to the prescriber's office for administration.

How do prescriber's bill Part B vaccine administrations?

The provider's office administers the vaccine and charges the administration fee directly to Senior Whole Health.

How do prescriber's bill Part D vaccine administrations?

The provider's office administers the vaccine and charges the administration fee directly to the member. The member will pay out of pocket for the provider administration fee and then must request reimbursement through Express Scripts. This option should be avoided to prevent out of pocket costs for the member.

****Please see the chart below to determine which vaccines fall under Part D or Part B**

Which Vaccinations are considered as Part B or Part D?

How are vaccinations billed at the doctor's office?

Prescriber purchases the vaccine and then administers it to the member at the office.

For part B vaccines, the prescriber's office bills the HCPCS/CPT code for the vaccine and administration code as one claim directly to Senior Whole Health.

- If the prescriber's office does not take Senior Whole Health insurance and asks the member to pay out of pocket, the member should submit for reimbursement through Senior Whole Health member services process. For example, Minute Clinic is a separate entity from CVS, and is billing through medical claims (not pharmacy benefit). They do not take Senior Whole Health as an insurance and members have previously been asked to pay out of pocket.

Vaccine	CPT/HCPCS Code	Description	Brand Name	Admin Code
Influenza	90756	Influenza virus vaccine, quadrivalent (ccIIV4), derived from cell cultures, subunit, antibiotic free, 0.5 mL dosage, for intramuscular use	Flucelvax Quad	G0008
	90694	Influenza virus vaccine, quadrivalent (aIIV4), inactivated, adjuvanted, preservative free, 0.5 mL dosage, for intramuscular use		
	90688	Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.5 mL dosage, for intramuscular use	Afluria Quad FluLaval Quad Fluzone Quad	
	90682	Influenza virus vaccine, quadrivalent (aIIV4), inactivated, adjuvanted, preservative free, 0.5 mL dosage, for intramuscular use	Flublok Quad	
	90674	Influenza virus vaccine, quadrivalent (ccIIV4), derived from cell cultures, subunit, preservative and antibiotic free, 0.5 mL dosage, for intramuscular use	Flucelvax Quad	
	90673	Influenza virus vaccine, trivalent (RIV3), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use	Flublok	
	90672	Influenza virus vaccine, quadrivalent, live (LAIV4), for intranasal use	FluMist Quad	
	90662	Influenza virus vaccine (IIV), split virus, preservative free, enhanced immunogenicity via increased antigen content, for intramuscular use	Fluzone High Dose	
	90660	Influenza virus vaccine, trivalent, live (LAIV3), for intranasal use		
	90658/ Q2035/ Q2037	Influenza virus vaccine, trivalent (IIV3), split virus, 0.5 mL dosage, for intramuscular use	Afluria Fluvirin	
	90656	Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage, for intramuscular use	Afluria Fluvirin	
	90653	Influenza vaccine, inactivated (IIV), subunit, adjuvanted, for intramuscular use	Fluad	
	90630	Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, for intradermal use	Fluzone Intradermal Quad	
	Q2035	Influenza virus vaccine, split virus, when administered to individuals 3 years of age or older, for IM use	Afluria	
	Q2036	Influenza virus vaccine, split virus, when administered to individuals 3 years of age or older, for IM use	Flulavel	
	Q2037	Influenza virus vaccine, split virus, when administered to individuals 3 years of age or older, for IM use	Fluvirin	
	Q2038	Influenza virus vaccine, split virus, when administered to individuals 3 years of age or older, for IM use	Fluzone	
	Q2039	Influenza virus vaccine, not otherwise specified	N/A	

Pneumococcal	90670	Pneumococcal conjugate vaccine, 13 valent (PCV13), for intramuscular use	Prevnar13	G0009
	90732	Pneumococcal polysaccharide vaccine, 23-valent (PPSV23), adult or immunosuppressed patient dosage, when administered to individuals 2 years or older, for subcutaneous or intramuscular use	Pneumovax23	
Hepatitis B	90739	Hepatitis B vaccine (HepB), adult dosage, 2-dose schedule, for IM use	Recombivax HB	G0010
	90740	Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 3-dose schedule, for IM use	Recombivax HB	
	90746	Hepatitis B vaccine (HepB), adult dosage, 3-dose schedule, for IM use	Engerix B Recombivax HB	
	90747	Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 4-dose schedule, for IM use	Engerix B Recombivax HB	

For part D vaccines, the prescriber’s office bills one claim for the vaccine and administration through TransactRx Vaccine Manager. (SWH cannot accept claims for Part D vaccines directly from providers).

- To enroll in TransactRx Vaccine Manager go to: <https://enroll.mytransactrx.com>
 - TransactRx Physician Support: 1-866-522-3386 or <http://www.transactrx.com/solutions/physicians-offices/>
 - TransactRx does not process part B or Medicaid only claims

For Medicaid only members- vaccine and administration codes can be submitted under one claim directly to Senior Whole Health, regardless of whether the vaccine falls under Medicare Part D or Part B.

Are there any vaccines that are not covered through Medicare?

The vaccines below are excluded from coverage through Medicare because the manufacturer is not registered with CMS. If these vaccinations are sent as a prescription to a pharmacy and billed through the pharmacy benefit, it will reject as “not covered under Medicare D benefit.” The member will need to assume responsibility for these costs.

- BIOTHRAX VACCINE VIAL
- VIVOTIF EC CAPSULE
- VAXCHORA VACCINE
- HEPLISAV-B 20 MCG/0.5 ML SYR
