A fax bulletin from Molina Healthcare of Michigan (MHM) January 24, 2022

Change to Bowel Preparation Product Coverage

In March 2021, there was a shortage of certain manufacturers of polyethylene glycol 3350 with electrolytes (PEG-3350) used for bowel preparation. To assist our Molina Healthcare of Michigan **Medicaid members** and providers with the shortage, Molina Healthcare of Michigan had **temporarily** allowed the following products to be filled at the pharmacy without need for prior authorization. The reported shortage has since been resolved.

Molina will now be **replacing prior authorization** requirements on **non-preferred bowel preparation products**. This change will take effect **3/1/2022**.

Medications that will require prior authorization again include:
