2021 HEDIS® Data Collection

Information for all network providers

The Healthcare Effectiveness Data and Information Set (HEDIS®) from the National Committee for Quality Assurance (NCQA) is a tool used to report performance on quality of care and service. Molina started collecting this data in February. We appreciate your prompt response to requests.

Molina is required to collect and provide medical record documentation from our providers to fulfill state and federal regulatory and accreditation requirements. Health Insurance Portability and Accountability (HIPAA) regulations permit a covered entity (physician practice) to disclose protected health information (PHI) to another covered entity (health plan) without enrollees’ consent for the purpose of facilitating health care operations.

Molina will reach out to providers via phone and fax with collection instructions and a corresponding member list. The following options are available for record submission:

- Providers may allow Molina Healthcare access to their Electronic Health Records (EHR) for quick access to records pertaining to the specific HEDIS® project
- Secure email, fax or mail
- An onsite visit by Molina; based on the volume of records

For EHR setup email RegionB_EMRSsupport@MolinaHealthCare.com.

### Routine Hospice Reimbursement Methodology Update
**Information for hospice providers in the Medicaid network**

In accordance with Ohio Department of Medicaid (ODM) Hospice policy, Ohio Administrative Code 5160-56-06, Hospice Services: reimbursement, (C)(1)(a), routine hospice care should be paid at a higher rate for the first 60 days of each hospice episode. Molina’s system was not configured to apply this methodology consistently and is now being updated to ensure alignment with the ODM policy.

Molina’s claim system must identify multiple episodes of routine hospice care when there is a date gap of 60 days or more between any benefit periods. The number of episodes of routine hospice care will be equal to the number of times there is a date gap of 60 days or more between benefit periods. If there are no greater-than-59-days gaps, the number of episodes would be 1 episode. If there is one greater-than-59-days gap, the number of episodes would be 2 episodes. If there are 4 greater-than-59-days gaps, there would be 5 episodes. If the recipient enters back into hospice and the gap in the benefit plan is 59 days or less, the prior episode end date is updated, and the reimbursement is at the lesser rate. If the recipient enters back into hospice and the gap in the benefit plan is 60 days or more, the prior episode end date is updated, and the reimbursement is at the higher rate.
