

# Ouma Health + Molina Healthcare of Utah: Extra Help for Maternity Care

## Who We Are

Ouma Health is a clinician-led maternity telehealth program. We provide access to:

- Maternal-Fetal Medicine (MFM) specialists
- Behavioral-health clinicians
- Personalized nurse navigation

## Why We Are a Molina Partner

Molina has partnered with Ouma to make timely prenatal care easier to get. We support – not replace – your patient relationship. Together, we help more pregnant people get care when needed.

## How We Work Together

1. You refer new OB patients to Ouma for intake.
2. Within 24 hours, Ouma completes a virtual visit that includes history and physical (H&P), risk screening, and HEDIS counseling. We can send prescriptions and lab orders.
3. We send a clear H&P and care plan to your office before the first in-person visit so your team can focus on the relationship.
4. We remain available for MFM consults, lactation help, and behavioral-health services.
