Free Smoking Cessation Program for Molina Apple Health Patients

Although tobacco use has decreased in recent years, many people still need help to kick the habit.

This is why Molina offers both smoking cessation products and enhanced smoking cessation services to members using either tobacco products or e-cigarettes through the Quit-4-Life program. Quit-4-Life is available to all Medicaid members 18 years of age and older, free of charge. For more information on this program, call (866) 784-8454.

Additionally, Molina's Health and Wellness team provides smoking cessation support to Medicare members and Medicaid pregnant women under the age of 18. For more information, call (866) 891-2320.

Additional important information:

- Medicaid patients can purchase OTC smoking cessation products using their ProviderOne Services Card
- To learn which pharmaceutical smoking cessation products and aids are available on Molina's formulary, or if you would like to request approval for a product not currently on the formulary, please call our pharmacy department at (800) 213-5525
- According to Health Care Authority Medicaid guidelines, no authorization is needed for clinicians to bill for office-based smoking cessation counseling services for pregnant women (CPT code 99407)

Thank you for your service to Molina members.
