FORMULARY GUIDE (ENGLISH)

INTRODUCTION

We are pleased to provide the *2023 Molina Healthcare (Molina) Preferred Drug List (Formulary)* as a useful reference and informational tool. This guide can help medical providers select clinically appropriate and cost-effective products for their patients.

The drugs in this guide have been reviewed by a Pharmacy and Therapeutics (P&T) Committee and are approved before being included. This guide reflects current medical practice as of the date of review.

The information in this guide is provided solely for the benefit of medical providers. We do not guarantee accuracy of such information. This guide is not intended to be comprehensive in nature. All the information in the guide is provided as a reference for drug therapy selection.

This guide is subject to state-specific regulations and rules, including, but not limited to, those about generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

Molina is not responsible for the actions or omissions of any medical provider based on information in this guide. The medical provider should check the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

This guide is organized by sections. Each section is divided by therapeutic drug class by type.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

We use the services of a Pharmacy and Therapeutics Committee ("P&T Committee") to approve safe and clinically effective drug therapies. The P&T Committee is an advisory body of clinical professionals. The P&T Committee's voting members include physicians and pharmacists who all have a broad background of clinical and academic expertise on prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To help you understand which specific strengths and dosage forms are covered, some general guidelines are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., atorvastatin).
- The second column (labeled Drug Tier) will list what tier the drug is placed on in the Drug Formulary.

- The third column (Requirements/Limits) contains any special requirements for coverage of your drug.
- If the OTC and prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms will be consistent with the category and use where listed.

GENERIC SUBSTITUTION

Generic substitution is when your pharmacy may dispense a generic version instead of a prescribed brand-name product. In this guide, lowercase italicized type means a generic version is available. In most instances, if there's a generic product available, the brand-name version will become non-formulary. The generic product will be covered instead of the brand-name version. However, this guide is subject to state specific regulations and rules for generic substitution and mandatory generic rules apply where appropriate.

Prescription generic drugs are:

- Usually priced lower than their brand-name equivalents
- Approved by the U.S. Food and Drug Administration for safety and effectiveness. They are manufactured under the same strict standards that apply to brand-name drugs
- Tested in humans to make sure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter how safe and effective they are
- Manufactured in the same strength and dosage form as the brand-name drugs

When a generic drug is substituted for a brand-name drug, the generic should be just as safe and effective as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

- This guide represents Molina and AHCCCS Medicaid's Preferred Drug List . Generic medications are typically available at the lowest cost. Brand-name medications usually cost more than generic versions. This guide lists drugs in the following manner:

Preferred Drugs

Non-Preferred Drugs

The medications listed in this guide are covered by Molina as represented. Molina covers certain medications on the list if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.). Molina will review requests for such medications outside of their listed criteria for medical necessity. If a medication is not listed, you may request a formulary exception for coverage. We will review medical necessity or formulary exception requests based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log into **www.MolinaHealthcare.com** to check coverage.

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have proven not to work. When this happens, the physician may fax a completed drug prior authorization form to Molina at (844) 271-6887 -. You can find these forms at www.MolinaHealthcare.com. We will not consider trials of pharmaceutical samples as rationale for approving a prior authorization request.

PRIOR AUTHORIZATION HELPFUL HINTS

For the quickest response possible from Molina's pharmacy department, please provide relevant information with the Prior Authorization request.

The following are examples:

Class of Medication/Diagnosis	Requested Clinical Information
Cholesterol Lowering	Lipid Panel, Cardiovascular risk factors
Diabetes	A1c Report
Non-Formulary/Non-Preferred Medication	Medication Log and/or Progress Notes documenting previous use of Formulary medications

EXCLUDED SERVICES

Please note that certain medications are excluded. These include, but are not limited to:

- Drugs used to promote fertility
- Agents used for cosmetic purposes or hair growth
- Agents used for the treatment of sexual or erectile dysfunction, unless such agents are used to treat a condition other than sexual or erectile dysfunction, for which the agents have been approved by the FDA
- All DESI (Drug Efficacy Study Implementation) drugs as defined by the FDA to be less than effective. Compound prescriptions, which include a DESI drug, are not covered
- Drugs which have been recalled
- Experimental drugs or non-FDA-approved drugs
