Molina Dual Options Cal MediConnect Plan
Medicare-Medicaid Plan

We Value Your Feedback!

We want to hear from you! Below are a few of the surveys you may receive in the mail:

- Consumer Assessment of Health Care Providers and Systems (CAHPS): this survey asks members about their experiences with health care.
- Health Outcomes Survey (HOS): this survey asks members about their health and how they make their healthcare choices.

If you receive any of these surveys, please respond. Your feedback will tell us what we're doing well. It can also tell us how we can improve your health care. We want to make sure you are getting the care you deserve.

Appointment Expectations and Reminders

What should I expect when making an appointment?

When you call to make an appointment, you can expect the wait times below. Your wait will depend on the reason you need to see a provider.

Visit Type	Standard Wait Times
PCP or Specialist – Urgent Care	Within 48 Hours
PCP-Routine or Non-Urgent Care	10 Working Days
PCP-Adult Preventive Care Visit	20 Working Days
Specialist-Routine or Non-Urgent Care	15 Working Days
Non-Urgent with a Non-Physician Behavioral Health Care Provider	10 Working Days

If you are a “walk-in” patient, keep in mind:

1. Always take your Molina Dual Options ID card and any other health plan card you may have to each visit.
2. Your provider may not be able to see you until he/she has seen others who have appointments.
3. If your provider cannot see you, you may be given the choice of seeing another provider at the office.

Before your visit:

1. Write down any questions you would like to ask your provider.
2. Bring your medicines to review with your provider.
3. If you have not been feeling well, make a list of your symptoms.

At your visit:

1. Get to your provider’s office 15 minutes early. You may need to fill out forms.
2. Please be patient if your provider is running late.
3. Tell your provider your concerns and symptoms as best as you can.
4. Ask your provider about ways to improve your health.
5. Ask your provider about treatment options.
6. Ask your provider to explain anything you don’t understand.
7. Make sure your provider answers all your questions before you leave.
8. Your provider may refer you to a specialist or other health care provider.
9. Ask if you will need to schedule the visit. Ask for his/her phone number.

Talk to your PCP!

Talk to your PCP about these health topics at each visit. Use the table below to record the date you spoke with your PCP.

Well Check-up

Checkups can make sure you are in good health. Seeing your provider for a checkup can also help find health problems early. Health problems that are found early can be treated to keep the problem from getting worse.

Physical Activity

Routine physical activity is good for you. It can help prevent many health problems. Always ask your PCP before you start any exercise program.

Physical Health

Talk to your PCP about your health. Ask him/her ways to eat healthy, quit smoking, or lose weight. Discuss topics that you think will help you have good health.

Emotional and Mental Health

Talk to your PCP if you feel sad for long cycles of time or have a low energy level. He/She can check your emotional health and give you tips to feel better.

Medication Review

Medicine helps you manage or treat a health problem or illness. It is vital to review all of your prescribed medicines, and over-the-counter medicines with your PCP. Medicine can become dangerous if it is not taken correctly or if it reacts with other medicines you take.

Pain Management

Talk to your PCP at each visit if you have any type of pain. Discuss treatment options with your PCP.

Advance Directive

An Advance Directive is a legal form that tells health care providers what kind of care you want if you are very ill and cannot speak for yourself. To avoid choices being made against your will, it is vital to have one. Talk to your PCP about making an Advance Directive. Review it with your PCP at least once a year.

Fall Prevention

Do not let a fear of falling keep you from being active. Let your PCP know if you have fallen, have trouble walking, or have balance problems. He/She may suggest testing your blood pressure, vision, or hearing to treat balance problems.

Improving Bladder Control

There are many ways to treat leakage of urine. Your PCP can help you treat and often cure leakage of urine. He/She may suggest training exercises, medicines or surgery. Discuss choices with your PCP that are best for you.
