Verifying Medicaid Enrollment

Verifying Medicaid Enrollment

- To join the Molina Medicaid Network, providers must be actively enrolled with the state's Medicaid agency.

- Molina verifies each provider's Medicaid enrollment status before the provider can be listed in our Medicaid network.

- Please ensure your state Medicaid enrollment is active for the NPI submitted on your Molina application.

- If your Medicaid enrollment cannot be verified, your case status will be updated to "Pending Medicaid Verification."

  o The case will remain open for 30 days while Molina attempts to verify the provider's enrollment status. Credentialing will not begin until enrollment is verified.

  o If enrollment cannot be verified after 30 days, the credentialing request will be discontinued.

  o If a discrepancy is identified in the state's provider file, providers should contact their Provider Services team and submit documentation as evidence of their active state Medicaid enrollment.
