1. Well Child Exam: Periodic and/or yearly medical exam for children. It includes medical history, physical check up, weight, height, head circumference, and health education. It can include tests or screenings, such as dental, vision and hearing.
2. Flu: Yearly for children 6 months to 18 years. Two doses should be given to children less than 9 years old, if they are getting the flu shot for the first time, or if they were given only one dose for the first time during the last flu season.
