### Manage Your Asthma

Asthma is a chronic disease that affects the airways in your lungs. When you have an asthma attack, your airways swell. This makes it hard to breathe.

Most people with asthma should take a **controller medicine**. It helps prevent asthma symptoms. You need to take it each day.

A **rescue medicine** is for sudden asthma symptom relief. Talk to your provider about any medicine you take and how a controller medicine can help you.

### Medicine Refills

Talk to your provider to learn what options you have to refill your medicine. Your medicine is important to help you manage your asthma.
