PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of the Common Formulary Committee, the State of Michigan Pharmacy and Therapeutics Committee ("P&T Committee"), and Molina Healthcare's Pharmacy and Therapeutics Committee are utilized to approve safe and clinically effective drug therapies. Committee voting members include physicians and pharmacists, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, general principles are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., *atorvastatin*).
- Listed products on the document generally include all strengths and dosage forms of the cited product.
- This document may not contain all available dosage forms (including injectable dosage forms).
- If the OTC and Prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products are listed separately.
- Dosage forms on the document will be consistent with the category and use where listed.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In this document, *lowercase italicized* type indicates generic availability. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. This document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and efficacy and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

The document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log in to www.molinahealthcare.com to check coverage.

CATEGORIES OF CONSIDERATION

OPIOID ANALGESICS

All Opioid Analgesics are subject to a Morphine Equivalent Dose of 90MME per day and Acute Pain Duration Limits.

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have demonstrated ineffectiveness. When these exceptional situations arise, the physician may fax a completed drug prior authorization form to Molina at (888) 373-3059. The forms may be obtained by logging into the website www.molinahealthcare.com. Trials of pharmaceutical samples will not be considered as rationale for approving a prior authorization request.

PRIOR AUTHORIZATION HELPFUL HINTS

To ensure the quickest response possible from Molina Healthcare of Michigan Pharmacy Department, please provide relevant information with the Prior Authorization request such as medication log, progress notes documenting previous use of Formulary medications, and/or lab reports.

URGENT AND AFTER-HOURS MEDICATION POLICY

To prevent a member's condition from worsening in an urgent situation, it may be necessary to dispense a 72-hour supply of an acute medication before prior authorization may be obtained from Molina Healthcare. (e.g., a member is discharged from a hospital after regular business hours with a special antibiotic prescription). Pharmacies are instructed to use their professional judgment. Molina Healthcare will reimburse pharmacies for a 72-hour supply of an acute medication at contracted rates for these prescriptions. Pharmacies may contact CVS Caremark Help Desk at (800) 364-6331 to obtain an override for a 72-hour supply.
