Mental Health and Substance Use Disorder Treatment Services

Effective 7/1/18, the following mental health and substance use disorder treatment services are available through the plan:

- Medical Services
- Medication-Assisted Treatment for Addiction
- Office Administered Medications
- Psychological Testing
- Mental Health Day Treatment
- Substance Use Disorder Treatment Services to include Peer Recovery Support, Partial Hospitalization, and Residential Treatment
- Therapeutic Behavioral Service
- Psychosocial Rehabilitation
- Community Psychiatric Support Services

In addition to these services, two new services are also available: Assertive Community Treatment and Intensive Home Based Treatment.

If you need mental health and/or substance abuse treatment services, call Member Services at (800) 642-4168 (TTY for the hearing impaired: (800) 750-0750 or 711) or visit the Provider Directory at MolinaHealthcare.com/ProviderSearch. You can see a provider that is part of our behavioral health network. You don't need a referral to see a doctor. You can pick or change your behavioral health provider at any time. Your Care Manager can help you get the services you need and provide a list of covered services.

Health Education

As a Molina Member, you have access to health education on our website. Visit <http://tinyurl.com/MolinaHealthEd>. If you have Diabetes, talk to your provider about a dilated eye exam.

Opioids and the Opioid Epidemic

About Opioids:

Opioids are a type of pain medicine. They can help people manage illness, injury or surgery. Doctors prescribe opioids to reduce pain signals to the brain. All these are opioids:

- Codeine
- Fentanyl
- Hydrocodone
- Morphine
- Oxycodone
- Oxycontin
- Heroin—an illegal kind of opioid

Opioids are highly addictive. Taking opioids without a medical reason or overusing them can cause addiction--fast. In fact, opioid addiction is an epidemic in the U.S. Every day, about 91 Americans die from opioid overdose, according to the CDC (Centers for Disease Control).

Taking too many doses of opioids can have dangerous results. If your doctor prescribes an opioid medication, take it only as directed. Taking more than your doctor has prescribed can result in:

- Weak breathing
- Constipation
- Blocked pain signals
- Mental confusion
- Nausea
- Organ damage
- Death—**Opioids are so strong, even one large dose can kill you.**

How do you know if you're depending too much on opioids? Watch for these signs:

- You keep raising the dose to control pain
- When you use less medicine or quit, you get symptoms of withdrawal like stomach cramps, muscle aches or cold sweats

What are the signs of abuse?

- Using your medicine with other drugs your doctor did not order
- Too many refills
- Injecting the medicine or snorting it

Talk to your doctor about how opioid medicines can affect you.
