Manage Your Asthma

Asthma is a chronic disease that affects the airways in your lungs. When you have an asthma attack, your airways swell. This makes it hard to breathe.

Most people with asthma should take a **controller medicine**. It helps prevent asthma symptoms. You need to take it each day.

A **rescue medicine** is for sudden asthma symptom relief. Talk to your provider about any medicine you take and how a controller medicine can help you.

Medicine Refills

Talk to your provider to learn what options you have to refill your medicine. Your medicine is important to help you manage your asthma.
