

Spring 2015 Health & Wellness Newsletter

Skin Cancer Awareness

Skin cancer is the most common form of cancer. Ultraviolet (UV) rays damage your skin. Ask your provider to check your skin for signs of skin cancer. You can prevent skin cancer. Here are some key steps to protect your skin:

- Wear sunscreen with at least SPF 15. Reapply throughout the day.
- Limit your time in the sun. UV rays are the strongest from 10 a.m. to 4 p.m.
- Wear a hat and sunglasses when in the sun.

Are You Taking Any Medicine?

Make sure to keep a list of all your prescription and over the counter medicines. Review your list with your provider at least once a year. Bring your current medicine with you to all provider appointments. This helps make sure that you:

- Take all the medicines you need.
- Stop taking the ones you no longer need.
- Take medicines that are safe to take together.
