Remember children's well visits too

Don't wait until your child is sick to go to the doctor

Handy checklist inside!

Molina Complete Care

Healthy Check List – Kids

Call your child's doctor and schedule his or her yearly well visit.

You take your child to the doctor when he or she is sick, but yearly well visits are just as important for your child's health.

These well visits help you:

- Prevent illness and disease
- Track your child's growth and learning
- Ask questions and talk about concerns
- Work with your child's doctor as a team
- Talk about medications your child is taking

Call 911 if you have a medical emergency.

Take this handy checklist with you to your child's doctor. This will help make sure your child gets the care he or she needs.
