### RISK ADJUSTMENT & HEALTH and HUMAN SERVICES

2018 - 2019

## RISK ADJUSTMENT DATA VALIDATION (HHS-RADV) DATA COLLECTION

This is an advisory notification to Molina Healthcare of California (MHC) network providers and office managers.

The Centers for Medicare & Medicaid Services (CMS) uses Risk Adjustment diagnosis codes and demographic data to appropriately report and produce complete and accurate diagnosis and the health status of Medicare enrollees.

Molina Healthcare of California (Molina Healthcare), with your assistance, will facilitate medical record review and begin collecting and compiling **Risk** Adjustment data. MHC staff will contact you, beginning July 1, 2019 to arrange a convenient collection method of required medical record information.

In order to provide adequate time to prepare the requested information, a member list with required medical record information will be provided and communicated to you. We welcome you to send records fast, quick and secure by utilizing our Secure Email: <u>MHCHEDISDepartment@MolinaHealthCare.Com.</u> MHC can also coordinate site visits to access medical records as well, please contact us at **1-888-562-5442**, **extension 129578**.

As a reminder providers must follow all HIPAA, State, and Plan contractual requirements when submitting member records that contain PHI electronically via email.

We appreciate your cooperation and professional courtesy to Molina Healthcare Quality Improvement staff, as they begin this year's medical record review process.

Thank you for your assistance in this effort and for your continued work to improve the health of our members and communities.

#### QUESTIONS

If you have any questions regarding the notification, please contact your Molina Provider Services Representative at (855) 322-4075. Please refer to the extensions to the left.

If you are not contracted with Molina and wish to opt out of the Just the Fax, call (855) 322-4075, ext. 127413 Please leave provider name and fax number and you will be removed within 30 days.
