

# Provider Memorandum

## Pharmacies supplying SNFs, ICF/DD, and LTCs approved immunizations

Molina Healthcare of Illinois (Molina) utilizes its Pharmacy Benefit Manager (PBM), CVS/Caremark, to reimburse in-network pharmacies supplying Skilled Nursing Facilities (SNF), Intermediate Care Facilities (ICF/DD) for Developmental Disabilities, and Long Term Care (LTC) providers the HFS approved vaccinations without requiring any prior authorization. In order to ensure correct reimbursement, the guidelines in this Provider Memorandum will need to be observed.

- Must be billed to Molina's PBM (CVS/Caremark) using the correct NCPDP format

### Vaccine only

- If the pharmacy is only supplying the vaccination and not administering it, the pharmacy will be reimbursed for the vaccination **only**
  - Submit the drug cost electronically according to current claims submission protocol, **without** populating NCPDP fields 440-E5 and 438-E3
- Payment for administration of the vaccine is included in the Per Diem rate that the facility receives

### Vaccine plus administration

- When submitting administered vaccine claims to CVS/Caremark, utilize "MA code processing" utilizing NCPDP fields 440-E5 and 438-E3
- Pharmacy will be reimbursed for the vaccination **and** for the administration of the immunization if billed correctly

Out-of-network pharmacies will need to participate with CVS/Caremark to provide these services and be reimbursed for the benefit. In order to participate, access the website below and complete the on-line Pharmacy Pre-Enrollment Questionnaire.
