Prior authorization (PA) is required for odevixibat (Bylvay). Payment will be considered under the following conditions:

1. **Request adheres to all FDA approved labeling for indication, including age, dosing, contraindications, warnings and precautions, and drug interactions; and**
2. **Patient has a diagnosis of genetically confirmed progressive familial intrahepatic cholestasis (PFIC) type 1 or type 2; and**
3. **Genetic testing does not indicate PFIC type 2 with ABCB 11 variants encoding for nonfunction or absence of bile salt export pump protein (BSEP-3); and**
4. **Patient has moderate to severe pruritis associated with PFIC; and**
5. **Patient's current weight in kg is provided; and**
6. **Is prescribed by or in consultation with a hepatologist or gastroenterologist.**

Initial authorizations will be approved for 3 months for initial treatment or after a dose increase. Additional authorizations will be considered when the following criteria are met:

1. **Patient's current weight in kg is provided; and**
2. **Documentation is provided the patient has responded to therapy and pruritis has improved. If there is no improvement in pruritis after 3 months of treatment with the maximum 120 mcg/kg/day dose, further approval of odevixibat will not be granted.**

IMPORTANT NOTE: *In evaluating requests for prior authorization the consultant will consider the treatment from the standpoint of medical necessity only. If approval of this request is granted, this does not indicate that the member continues to be eligible for Medicaid. It is the responsibility of the provider who initiates the request for prior authorization to establish by inspection of the member's Medicaid eligibility card and, if necessary by contact with the county Department of Human Services, that the member continues to be eligible for Medicaid.*
