

Request for Prior Authorization CNS STIMULANTS AND ATOMOXETINE

FAX Completed Form To 1 (877) 733-3195 **Provider Help Desk** 1 (844) 236-1464

any covered diagnosis, the prescriber must review the patient's use of controlled substances on the Iowa Prescription Monitoring Program (PMP) website. Request must adhere to all FDA approved labeling for requested drug and indication, including age, dosing, contraindication warnings and precautions, drug interactions, and use in specific populations. Payment for CNS stimulants and atomoxetine will be considered when patient has an FDA approved or compendia indication for requested drug under the following conditions: I) Attention Defice Hyperactivity Disorder (ADHD) meeting the DSM-5 criteria and confirmed by a standardized rating scale (such as Conners, Vanderbil Brown, Snap-IV). Symptoms must have been present before twelve (12) years of age and there must be clear evidence of clinically significated impairment in two or more current environments (social, academic, or occupational). Documentation of a recent clinical visit that confirm improvement in symptoms from baseline will be required for renewals or patients newly eligible that are established on medication to treat ADHD. Adults (≥ 21 years of age) are limited to the use of long-acting agents only. If a supplemental dose with a short-acting agent is needed for an adult in the mid to late afternoon, requests will be considered under the following circumstances: the dose of the long-acting agent has been optimized, documentation is provided a short-acting agent of the same chemical entity is medically necessary (e.g. employed during the day with school in the evening), and will be limited to one unit dose per day. Children (< 21 years of age) are limited to the use of long-acting agent.

Request for Prior Authorization CNS STIMULANTS AND ATOMOXETINE

(PLEASE PRINT - ACCURACY IS IMPORTANT)

Diagnosis:	
☐ Attention Deficit Hyperactivity Disorder (ADHD)	
Did patient have inattentive or hyperactive/impulsive symptoms present prior to age 12? Yes No	
Date of most recent clinical visit confirming improvement in symptoms from ba	seline:
Rating scale used to determine diagnosis:	
Documentation of clinically significant impairment in two or more current env	rironments (social, academic, or occupational).
Current Environment I & description:	
Current Environment 2 & description:	
Requests for short-acting agents:	
Has dose of long-acting agent been optimized? Yes No	
Adults: Provide medical necessity for the addition of a short-acting agent:	
Children: Provide medical necessity for the need of more than one unit of a she	ort-acting agent:
Weight Loss Position therapy CPAP Date: Maximum titration BiPAP Date: Maximum titration Surgery Date: Specifics: Diagnosis confirmed by a sleep specialist? Yes No Other (specify) Prescriber review of patient's controlled substances use on the lowa PM No Yes Date Reviewed:	rome (OSAHS) Yes If Yes, please indicate below: on?
lease document prior psychostimulant trial(s) and failures(s) including drug name(easons:	s) strength, dose, exact date ranges and failure
Other - Please provide all pertinent medication trial(s) relating to the diagnosis in anges:	cluding drug name(s) strength, dose and exact date
eason for use of Non-Preferred drug requiring approval:	
Prescriber signature (Must match prescriber listed above.)	Date of submission

IMPORTANT NOTE: In evaluating requests for prior authorization the consultant will consider the treatment from the standpoint of medical necessity only. If approval of this request is granted, this does not indicate that the member continues to be eligible for Medicaid. It is the responsibility of the provider who initiates the request for prior authorization to establish by inspection of the member's Medicaid eligibility card and, if necessary by contact with the county Department of Health and Human Services, that the member continues to be eligible for Medicaid.
