Re: Molina EVV Stipend

Dear Provider:

This communication is related to the New Mexico Electronic Visit Verification (EVV) project as delineated in our Centennial Care contract, and directions and policies from the Human Services Department Medical Assistance Division leadership.

Please keep in mind that the first option for transmitting data into the EVV Authenticare system is through the voluntary use of the member's landline or cell phone using the Interactive Voice Response (IVR) system. The second option is to offer a stipend for caregivers who use their personal smartphone or tablet to transmit such data. Molina Healthcare of New Mexico, Inc. (Molina Healthcare) has set a stipend rate of \$14 per month for each caregiver who uses their own device with the Authenticare application to log Personal Care Services (PCS) visits. Only one stipend per caregiver per month maximum is permitted. This stipend will be effective on June 1, 2016, but each month can be billed after month-end. That is, June may be billed in July, July in August, and so forth. You will use the G9006 U1/U2 service codes to bill the stipends, and a follow up communication will be sent in mid-June that will explain the process details further.

Thank you for your continued service of Molina Healthcare members.

If you have any questions, please contact your provider services representative.

Sincerely,

LTSS Provider Services
Molina Healthcare of New Mexico
