### I. PURPOSE

Indications for determining medical necessity for Tricuspid Valve Surgery.

### II. DEFINITIONS

Tricuspid valve surgery (repair/replacement) is a cardiac surgery procedure frequently done during mitral valve surgery in which a patient's regurgitant or stenotic tricuspid valve is either repaired or replaced. An appropriate diagnostic or therapeutic procedure is one in which the expected clinical benefit exceeds the risks or negative consequences of the procedure by a sufficiently wide margin such that the procedure is generally considered acceptable or reasonable care. The ultimate objective of AUC is to improve patient care and health outcomes in a cost-effective manner but is not intended to ignore ambiguity and nuance intrinsic to clinical decision making.

Appropriate Care – Median Score 7-9

Maybe Appropriate Care – Median Score 4-6

Rarely Appropriate Care – Median Score 1-3

### III. POLICY

Indications for Tricuspid Valve Surgery are as follows:

- A. Tricuspid valve surgery is recommended for patients with severe TR undergoing left-sided valve surgery. **(AUC Score 7)<sup>1,2,3,4</sup>**
- B. Tricuspid valve repair can be beneficial for patients with mild, moderate, or greater functional TR (at the time of left-sided valve surgery with either 1) tricuspid annular dilation > 40 mm or 2) evidence of right HF). **(AUC Score 7)<sup>1,2,3,4</sup>**
- C. Tricuspid valve surgery is recommended for patients with severe TS at the time of operation for left-sided valve disease. **(AUC Score 7)<sup>1,2,3,4</sup>**
- D. Tricuspid valve surgery is recommended for patients with isolated, symptomatic severe TS. **(AUC Score 7)<sup>1,2,3,4</sup>**

#### Limitations

- A. Requests for services that are part of a surveillance protocol for patients who are involved in a clinical trial are considered out of scope (OOS) for New Century Health and cannot be reviewed.

## IV. PROCEDURE

- A. To review a request for medical determination, the following items must be submitted for review
  - 1. Latest Cardiology or Cardiothoracic Surgeon's note
  - 2. Most recent Echocardiogram or TEE
  - 3. Recent Cardiac Catheterization
- B. Primary codes appropriate for this service are: 33463, 33464, 33465 33530-Reoperation, CABG or Valve Surgery, more than 1 month after original operation.
- C. Place/Site of Service: Inpatient hospital (21)

## V. APPROVAL AUTHORITY

- A. Review – Utilization Management Department
- B. Final Approval – Utilization Management Committee

## VI. ATTACHMENTS

- A. None
