HOW TO IMPROVE HEDIS SCORES

- ☐ Review information related to readmission rates. The literature indicates that during the first 7 days post-discharge the patient is at greater risk for re-hospitalization.
- ☐ Ensure the follow-up appointment is made before the patient leaves the hospital and is scheduled within 7 days of discharge. A telehealth appointment within the appropriate timeframe meets compliance. Contact Molina Case Management if assistance is needed to obtain follow-up appointment.
- ☐ Assist the patient with navigation of the health system to lessen the impact of barriers, such as using their transportation benefit to get to their follow-up appointment. Ensure your patient has an understanding of the local community support resources.
- ☐ Review medications with patients (*and/or parent/caregiver as appropriate*) to ensure they understand the purpose and appropriate frequency and method of administration.
- ☐ Ensure accurate dates are documented for hospital discharge, scheduled outpatient appointments, and kept appointments.
