HOW TO IMPROVE HEDIS SCORES

- ☐ Use needed services lists to identify women who need a Pap test.
- ☐ Use a reminder/recall system (e.g., tickler file).
- ☐ Request to have results of Pap tests sent to you if done at OB/GYN visits.
- ☐ Document in the medical record if the patient has had a hysterectomy with no residual cervix and fax Molina the chart. Remember synonyms – “total”, “complete”, “radical.”
- ☐ Use ICD-10 diagnosis codes to report exclusions to the HEDIS measure such as absence of the cervix.
- ☐ Avoid missed opportunities e.g., completing Pap tests during regularly-scheduled well woman visits, sick visits, urine pregnancy tests, UTI, and chlamydia/STI screenings.
