HOW TO IMPROVE HEDIS SCORES

- ☐ Review diabetes services needed at each office visit.
- ☐ Order labs prior to patient appointments.
- ☐ Bill for point of care testing if completed in office and ensure HbA1c result and date are documented in the chart.
- ☐ Adjust therapy to improve HbA1c and BP levels; follow-up with patients to monitor changes.
- ☐ Make sure a digital eye exam, remote imaging, and fundus photography are read by an eye care professional (optometrist or ophthalmologist) so the results count.
- ☐ Use 3072F if member's eye exam was negative or showed low risk for retinopathy in the prior year.
- ☐ Prescribe statin therapy to all diabetics age 40 to 75 years.
- ☐ Refer patients for Health Management interventions and coaching by contacting Health Care Services at your affiliated Molina Healthcare State plan.
