HOW TO IMPROVE HEDIS SCORES

- ☐ Use the State immunization registry.
- ☐ Review a child's immunization record before every visit and administer needed vaccines.
- ☐ Recommend immunizations to parents. Parents are more likely to agree with vaccinations when supported by the provider. Address common misconceptions about vaccinations, e.g., MMR causes autism (now completely disproven).
- ☐ Have a system for patient reminders.
- ☐ Some vaccines may have been given before patients were Molina members. Include these on the members' vaccination record even if your office did not provide the vaccine.
