

# HEDIS® Tips:

## Follow-up After Hospitalization for Mental Illness (FUH)

### MEASURE DESCRIPTION

Patients 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnosis and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner within 7- and 30- days of discharge. Visits must occur after the date of discharge.

### USING CORRECT BILLING CODES

#### Codes to Identify Follow-up Visits (*must be with mental health practitioner*)

### HOW TO IMPROVE HEDIS SCORES

- ☐ The literature indicates that during the first 7 days post-discharge the patient is at greater risk for re-hospitalization and, within the first 3 weeks post-discharge the risk of self-harm is high.
- ☐ Ensure that the follow-up appointment is made with a mental health practitioner before the patient leaves the hospital and is scheduled within 7 days of discharge. Contact Molina case management if assistance is needed to obtain follow-up appointment.
- ☐ Assist the patient with navigation of the health system to lessen the impact of barriers, such as using their transportation benefit to get to their follow-up appointment. Ensure your patient has an understanding of the local community support resources and what to do in an event of a crisis.
- ☐ Review medications with patients (*and/or parent/caregiver as appropriate*) to ensure they understand the purpose and appropriate frequency and method of administration.
- ☐ Ensure accurate dates are documented for hospital discharge, scheduled outpatient appointments, and kept appointments.. Visits must be with a mental health practitioner.
- ☐ Provide information about the importance of monitoring their emotional well-being and following up with their mental health practitioner.
- ☐ Follow-up visits must be supported by a claim, encounter or note from the mental health practitioner's medical chart in order to count toward the measure.
