HOW TO IMPROVE HEDIS SCORES

- Review diabetes services needed at each office visit.
- Order labs prior to patient appointments.
- Schedule telehealth appointments to diagnose patients with diabetes. Note: Only one of the two diagnosis visits are permitted to be telehealth, telephone visit or an online assessment.
- Bill for point of care testing if completed in office and Ensure HbA1c result and date are documented in the chart.
- Adjust therapy to improve HbA1c and BP levels; follow-up with patients to monitor changes.
- Make sure a digital eye exam, remote imaging, and fundus photography are read by an eye care professional (optometrist or ophthalmologist) so the results count.
- Use 3072F if member's eye exam was negative or showed low risk for retinopathy in the prior year in order to ensure accurate billing and coding.
- Prescribe statin therapy to all diabetics age 40 to 75 years.
- Refer patients for Health Management interventions and coaching by contacting Health Care Services at Molina Healthcare.
