### HOW TO IMPROVE HEDIS SCORES

- ☐ Screen for depression/mood changes at every visit. Consider using a validated tool (i.e. PHQ9) to identify depression symptoms.
- ☐ Provide referral and/or assist in making an appointment to a Behavioral Health Provider for patients who score high on your screening tool.
- ☐ Follow-up with your patient, by phone or telehealth appointment, to ensure they made or attended an appointment with a Behavioral Health Provider within 30 days of screening positive for depression.
- ☐ Ensure necessary releases are in place to include Parents/Caregivers and enable key providers (Psychiatrists, Therapist/Counselor, etc.) to collaborate on overall patient care and patient's ability to improve/maintain physical and emotional health.
- ☐ Refer patient/family/caregiver for Care Coordination/Case Management by contacting your Molina Healthcare for additional support.
