HEDIS® Tips:

Follow-Up After Emergency Department Visit for Mental Illness (FUM)

MEASURE DESCRIPTION

The percentage of emergency department (ED) visits for patients 6 years of age and older with a principal diagnosis of mental illness or intentional self-harm, who had a follow-up visit for mental illness. Two rates are reported:

- 1. The percentage of ED visits for which the patient received follow-up within 30 days of the ED visit (31 total days).
- 2. The percentage of ED visits for which the patient received follow-up within 7 days of the ED visit (8 total days).

HOW TO IMPROVE HEDIS SCORES

Schedule follow-up appointments with 7 days of ED discharge with a mental health practitioner before the patient leaves the hospital to reduce the likelihood of a preventable ED visit or hospital admission. A telehealth appointment within the required timeframe meets compliance. Contact Molina Case Management if assistance is needed to obtain follow-up appointment.
Conduct follow-up phone calls with the patient and/or parent/guardian 24 to 72 hours after discharge to
verify appointments are scheduled and address additional needs the patient may have.
Assist the patient with navigation of the health system to lessen the impact of barriers, such as using their
transportation benefit to get to their follow-up appointment.
Ensure your patient has an understanding of the local community support resources and what to do in an
event of a crisis.
Review medications with patients (and/or parent/caregiver as appropriate). Educate your patient on
the importance of taking their medication(s) and appropriate frequency.
Follow-up visits must be supported by a claim, encounter or note from a healthcare practitioner's medical
chart in order to count toward the measure.
Provide information about the importance of monitoring their emotional well-being and following up with
their mental health practitioner.
