

After Hours and Weekend Care Policy

Molina Healthcare of Texas will provide compensation to Molina PCPs for seeing patients in their office outside of normal operating hours.

- Texas Medicaid limits reimbursement for after-hours charges (procedure codes 99050, 99056, and 99060) to office-based providers rendering services outside of **routine office hours**. An office-based provider may bill an after-hours charge in addition to a visit when providing medically necessary services for the care of a client with an emergent condition outside of the provider's **posted, routine office hours**. Office-based physicians may receive additional reimbursement when either of the following exists and the reason is documented in the client's medical record:
 - The physician leaves the office or home to see a client in the emergency room.
 - The physician leaves the home and returns to the office to see a client outside of the physician's **routine office hours**.
 - The physician is interrupted from routine office hours to attend to another client's emergency outside of the office
- After-hours services will be reimbursed only when CPT code 99050 is billed.
- PCPs can see any Molina member after hours without an authorization – this benefit is not limited to their own assigned members.

If you have any questions, please call Molina Healthcare's Provider Services at 1-855-322-4080. Representatives are available to assist you from 8 a.m. to 5 p.m. Monday through Friday.
