**Important update from Molina Healthcare: Genetic Testing update for AHCCCS Complete Care Members Syphilis Screening**

Dear Valued Provider:

AHCCCS has updated AMPM 310 II Genetic Testing. Whole genome sequencing is now classified as a covered benefit for members who meet the criteria as specified in 2023 Arizona Senate Bill 1726; Laws 2023, Chapter 139 Section 9. Genetic testing continues to require prior authorization.

Genetic testing PA requests are to include documentation regarding how the genetic testing is consistent with the genetic testing coverage described in AHCCCS AMPM 310 II. All services need to be medically necessary.

As a reminder, Syphilis screening at least annually is required beginning at age 15. Updated EPSDT forms are available on the Molina Healthcare website following the link for provider forms or on the AHCCCS website AMPM 430 Attachment A (updated periodicity schedule) and Attachment E (clinical forms).

The Molina Healthcare website PA code lookup tool is located at [Molina Healthcare Arizona Providers](#).

You can access the prior authorization form on this site under Forms then click on Utilization Management.

For providers not wanting to use the Availity provider portal, faxed requests are accepted. Molina Clinical

Policies (MCP) are reviewed and updated annually. Current policies are available at [Molina Clinical](#)
